Brief for matchmaking

Azerbaijan based Finex Agro LLC is involved in engineering, building and management of modern greenhouses under different names, almost 15 years. Together with our technical and agronomy team we provide the following services for investors and entrepreneurs in greenhouse sector:

1. Engineering the proper steel construction and internal systems for a whole project
2. Construction of turnkey greenhouses and nurseries
3. Management of greenhouses and nurseries
4. Diagnostic and full checkup of greenhouses and nurseries
5. Repair and renovation work for greenhouses and nurseries
6. Cultivation and agronomy support for fruits and vegetables

During our business in the last 10 year, we have cooperated with Dutch companies such as Certhon, Bosman van Zaal, Debet Schalke. There were some Turkish companies among our partners as well. The most modern and functional greenhouses in Azerbaijan were built in cooperation with our company. You can see some of our projects in our website; <https://zfeniks.com/>

Since June of 2021 we started to manage 12 ha tomato greenhouse in Baku. Export to Russia is ongoing at the moment.

We are interested in cooperation with investors, entrepreneurs, existing greenhouse farm owners and those who need a technical support to start or develop greenhouse projects.

Sincerely,

Director

Babayev Elshan
